

The goal of Mizuno Kenji Patent & Law is to provide our clients with an in-depth, professional, and result-oriented legal services in a timely manner.

## Three missions for supporting corporations

MISSION

01

### Respond to changes

In Japanese market, there are high quality standards of products as well as severe price competition, and further, the product life-cycle tends to shorten more and more. In such Japanese market, companies need to make changes to respond to the market requirements. We support companies for such changes.

MISSION

02

### Create New Value

There are diversified needs in Japan where products have entered a maturity phase in various technical fields, so we should constantly create new value in order to meet such needs. We provide support for the creation of legal assets in Japan.

MISSION

03

### Realize, and further Develop

Legal value you possess will be meaningless if you do not realize it. We faithfully support an exercise of right so that creative technologies come into the spotlight also legally.

Faithfully support companies for their change, creation, and realization

Consult with us
